

|                              |  |
|------------------------------|--|
| <b>Project Title</b>         | <b>End-to-End Court Technology</b>   |
| <b>Project Area</b>          | Enabling Action  |
| <b>Beneficiary Countries</b> | CM   |
| <b>Source of Funding</b>     | Singapore  |
| <b>Approved Budget</b>       | USD 38,500   |
| <b>Project Description</b>   | This course will run as a workshop presenting the various IT systems used in the Singapore Judiciary (Supreme, Family Justice and State Courts) that have made the Singapore Judiciary and legal profession a more integrated, effective, efficient, user-centric and a paper-less system.   |
| <b>Objective</b>             | This course aims to provide training to CLMV countries to incorporate good regulatory practices which they are already adopting, and match them with strong legal and judicial practices and systems. It will contribute towards the development of useful systems in CLMV countries that will support the attainment of legal and judicial excellence and facilitate integration with the systems of other ASEAN countries. |
| <b>Implementation Status</b> | The trainings are going to be conducted on 7-10 August 2018 and 11-14 September 2018.  |
