

<b>Project Title</b>	<b>Training Course on Smart Nation: Strategy to Implementation</b>
<b>Project Area</b>	Enabling Action
<b>Beneficiary Countries</b>	Cambodia, Lao PDR, Myanmar, Viet Nam (CLMV)
<b>Source of Funding</b>	Singapore
<b>Approved Budget</b>	USD 75,349.89
<b>Project Description</b>	The Smart Nation programme is designed to build insight and understanding for policy makers and government leaders about how to foster the necessary collaborative approach towards the creation of a seamlessly connected society. The programme will explore the vision of the smart, connected society, and will consider the driving forces, risks and opportunities related to the concept. The programme will build participant skills and knowledge in the areas of fostering collaboration, transformational change, and leadership communications in the context of smart nation planning and opportunities, in order to understand how national, integrated programmes can be designed and delivered. The participants will learn the principles and practices of change management, collaboration, strategic decision making, and leadership communication that support the implementation of programmes like Smart Nation, designed to optimise IT and crowdsourcing opportunities in a rapidly evolving technology landscape.
<b>Objective</b>	<ul style="list-style-type: none"> <li>• To strengthen the capacity of CLMV government officials to implement the promotion of the new technology and policy approaches</li> <li>• To develop best practice guides and standards for smart city development.</li> </ul>
