

<b>Project Title</b>	<b>Developing Digital Government Strategies</b>
<b>Project Area</b>	Enabling Action
<b>Beneficiary Countries</b>	LM
<b>Source of Funding</b>	Singapore
<b>Approved Budget</b>	USD 61,006
<b>Project Description</b>	The changing demographics of citizens in an interconnected digital world have resulted in higher demands and expectations of e-services, transparency and accountability from their governments. This course aims to equip participants with management and leadership skills to identify, plan and implement digital government strategies in the public service through learning from Singapore's experience and best practices.
<b>Objective</b>	This project aims to help build the strategic leadership and administrative capability of CLMV countries in addressing the impact of technology developments and advancements. It also aims to encourage Governments to take an active and anticipatory approach to governance so as to meet both current and future challenges.
<b>Implementation Status</b>	The trainings were conducted between April and July 2018.
