

<b>Project Title</b>	<b>Smart Nation: Strategy to Implementation</b>
<b>Project Area</b>	Enabling Action
<b>Beneficiary Countries</b>	CLMV
<b>Source of Funding</b>	Singapore
<b>Approved Budget</b>	USD 90,772
<b>Project Description</b>	The course will include formal lectures, presentations, discussion, sharing sessions and group exercises. Through individual and group presentations and discussions and case studies, participants will have the opportunity to explore smart city strategies and the application to their own country situations. Participants will explore how to use digital technology in the home and environment, transport, health, business and public sector services to improve and enhance the way people live, work, play and interact.
<b>Objective</b>	The course aims to provide participants with the skills and knowledge in the areas of fostering collaboration, co-creation, transformational change, planning, leadership and leveraging of technology to design and deliver effective government programmes.
<b>Implementation Status</b>	The trainings are going to be conducted by Singapore on 13-17 August 2018; 20-24 August 2018; 10-14 December 2018; and 21-25 January 2019.
