DESCRIPTION OF TRADE BARRIER FACED
Please provide a description of the situation

The New Guidelines require that only cement sourced from foreign cement manufacturer plant(s) holding a valid Philippine Standard (PS) Quality and/or Safety Certification Mark License(s) shall be permitted to be imported into the Philippines. Moreover, an Import Commodity Clearance (ICC) shall be required for all cement importations except those imported by cement manufacturers with operating Integrated Cement Plant(s) in the Philippines.

As a consequence of these new regulations, importers or manufacturers have to apply for both PS License and ICC, which creates unnecessary obstacles to trade as well as burdensome and duplication of procedures. These duplicate requirements also delay customs clearance and create unnecessary cost of occupying warehouses for ICC sampling and testing. At the same time, these regulations lead to shorten shelf life and worsened market competitiveness of imported products.

Thailand is of the view that the regulations may violate Most Favor Nation Treatment, National Treatment, Application of Non-Tariff Measures, Import Licensing Procedures, and Technical Barriers to Trade obligations since the measures create unnecessary obstacles to trade and the requirements for ICC does not apply to cement product imported by an importer who has Integrated Cement Plant in Philippines.

Thailand would like to seek Philippines’ assistance to clarify and reconsider this matter in order to facilitate trade flows between the two countries.
