Notes
 Details may not add up to totals due to rounding off.

1/ Includes inflow from all other countries and unspecified countries as well as total reinvested earnings and inter-company loans in the Philippines

2/ Lao PDR's data on 'by source country' for 2013 is not available, intra-/extra-ASEAN breakdown are estimated by the ASEAN Secretariat.

The FDI is on a net basis, and computed as follows: Net FDI = Equity + Net Inter-company Loans + Reinvested Earnings. The net basis concept implies that the followings should be deducted from the FDI gross flows: (1) reverse investment (made by a foreign affiliate in a host country to its parent company/direct investor); (2) loans given by a foreign affiliate to its parent company; and (3) repayments of intra-company loan (paid by a foreign affiliate to its parent company). As such, FDI net inflows can be negative.
