

Risk Assessment for International Dissemination of COVID-19 to the ASEAN Region

ASEAN Biodiaspora Virtual Center (ABVC)

as of October 19, 2020 (2:00 PM GMT+8)

COVID-19: Highlights and Situation Overview

- Worldwide, there have been over 40.2 million cases and more than 1.11 million deaths attributed to COVID-19. Global COVID-19 daily cases rose by more than 400,000 for the first time on Saturday (October 17). Europe, which successfully tamped down the first surge of infections according to news, has emerged as the new coronavirus epicentre in recent weeks and is reporting on average 140,000 cases a day over the past week. As a region, Europe is reporting more daily cases than India, Brazil and the United States combined. France is reporting the highest seven-day average of new cases in Europe with 19,425 infections per day followed by the United Kingdom, Russia, Spain and Netherlands. In addition, Europe passed 250,000 deaths from COVID-19 on Sunday (October 18). The United Kingdom remains Europe's worst-affected country in terms of deaths, accounting for almost one-fifth of fatalities on the continent.
- The first case of COVID-19 was reported on October 17 in Wallis and Futuna, a French-administered island collective in the South Pacific region. A media report indicates that the affected individual arrived to the islands on October 3, has remained asymptomatic, and has been placed under isolation at a local hospital. Wallis and Futuna had previously been one of a handful of locations that had remained COVID-19-free throughout the global pandemic, likely due to their remoteness, and the fact the islands can only be reached through New Caledonia, which has a mandatory quarantine regime in place.
- Thailand, on October 17, has recorded its first two locally transmitted cases of COVID-19 in more than one month according to the COVID-19 administration centre. It said in its daily report that the cases were among two Myanmar nationals living near the Thai-Myanmar border. The two were tested on October 13. The new cases have also showed no symptoms. On October 18, Thailand reported three additional locally transmitted cases of COVID-19. The three new patients are family members of two Myanmar nationals who previously tested positive for the virus this week in the country's northern province bordering Myanmar.
- Thailand has been outlined to be the Southeast Asia production base for Oxford University's Covid-19 vaccine. The British-Swedish pharmaceutical company Astra-Zeneca is working with Oxford to make the vaccine, if and when it is approved, globally available and Siam Bioscience will manufacture the vaccine in Thailand. Thailand is planned to be the production base for the Association of Southeast Asian Nations, or ASEAN, which includes Indonesia, Singapore, Malaysia, Philippines, Vietnam, Brunei, Cambodia, Myanmar and Laos. In the earlier report, the British Embassy in Bangkok said if the vaccine is successful, it will be available to the Thai population by the first half of 2021.

Travel Advisories (new update/s)

- Laos: Laos' National Taskforce has set new quarantine measures for travelers arriving from countries free of COVID-19. According to a notice issued by the National Taskforce for Covid-19 Prevention and Control, returning residents who tested negative will be allowed to complete their quarantine in their homes or at their place of employment instead of the previous requirement for a 14-day quarantine in a designated quarantine center or hotel. International travelers, both Lao and foreign, must produce a medical certificate proving they are free of Covid-19 within 72 hours before travel.

- Philippines: The government is lifting the ban on non-essential travel of Filipinos by starting October 21. Filipinos traveling abroad must present a confirmed round trip ticket as well as adequate travel and health insurance for tourist visa holders. They must also follow the existing rules for returning overseas Filipinos as they fly home, which involves undergoing quarantine in dedicated isolation facilities while waiting for a negative swab test result. Those heading out should also sign an immigration declaration acknowledging the risks involved in traveling, as well as present a negative antigen test result taken within 24 hours before departure.

Cases and Deaths as of 19 October 2020

- As of October 19 (2PM, GMT+8), worldwide, there were **40,258,303** confirmed cases, including **1,118,278** deaths. Globally, Case Fatality Rate (CFR) is **2.78**.
- In **China**, there were **91,541** confirmed cases with **4,746** deaths, including deaths in Hong Kong (105) and Taiwan (7). Confirmed cases in China include confirmed cases in Hong Kong (5,242), Macau (92), and Taiwan (535).
- 838,192 confirmed cases** of COVID-19 have been reported in the ASEAN region with a total of **20,355 deaths**.
