

<b>Project Title</b>	<b>Industrial Revolution 4.0 and its Impact on Policy Formulation</b>
<b>Project Area</b>	Enabling Action
<b>Beneficiary Countries</b>	MV
<b>Source of Funding</b>	Singapore
<b>Approved Budget</b>	USD 83,006
<b>Project Description</b>	This course will discuss the challenges and opportunities posed by the 4th Industrial Revolution to the government and economy. The course will address in particular the impact of technology developments and the digital economy on work, manufacturing, the labour market and security and how Governments can prepare for and manage the challenges from these developments.
<b>Objective</b>	This course aims to help build the strategic leadership and administrative capability of CLMV countries in addressing the impact of technology developments and advancements. It also aims to encourage Governments to take an active and anticipatory approach to governance so as to meet both current and future challenges.
<b>Implementation Status</b>	The trainings are going to be conducted between May and October 2018.
