

<b>Project Title</b>	<b>Sustainable Development and Urban Planning</b>
<b>Project Area</b>	Enabling Action
<b>Beneficiary Countries</b>	LM
<b>Source of Funding</b>	Singapore
<b>Approved Budget</b>	USD 46,046
<b>Project Description</b>	<p>The course provides a platform for participants to gain a comprehensive understanding of Singapore's policies and frameworks in sustainable urban development and integrated town planning as well as the mechanisms used for development in a modern city-state. Participants will learn about the functions of Government in urban development policy, land strategy, town planning, concepts in drafting master plans, financing models that can ensure sustainability of the built environment and integration of urban development, public transport and sustainable public housing and how private residential market can play a supporting role. The topics covered will also include those related to land use planning, i.e. transport, housing, heritage and culture, environmental planning, infrastructure investment.</p> <p>The course will include formal lectures, practical sessions, case studies, group discussions, workshop exercises, sharing sessions and project activities and other interactive components such as video.</p>
<b>Objective</b>	Participants will be equipped with learning points on how sustainable urban policies and solutions are being developed and challenges overcome that they could apply to their respective countries.
<b>Implementation Status</b>	The trainings are going to be conducted on 3-7 September 2018 and 26-30 November 2018.
